MULTIFUNCTION SCALE

DAVIVENDY TOUCH MULTIFUNCTION SCALE

An integrated and versatile equipment

DaviVendy is a multifunctional scale of attractive and modern design, with unique lines, which combines high performance in a single team: it measures the height, the weight, calculates the body mass index and measures the body fat percentage through the BIA method (*Bioelectrical Impedance Analysis*).

FEATURES

10.1" Touchscreen

Interactive software with animations.
Multi-language.

Body fat meter

It measures the percentage of body fat

Ticket inbox

Cut ticket with the results of measurements and recommended values.
Possibility to customize the ticket.

Height sensor

Measure up to 202 cm.

Height meter

Height meter with LEDs

Speaker

Voice guide.

Multicoin selector

Accepts up to 6 types of coins.

Baby Scale

It can incorporate a baby scale.
Weights up to 15 kg.

Anti-slip Base

Placemarks.
Weight up to 225kg.
Sliding wheels to make transportation easy.
Integrated bubble level.

DIMENSIONS

62 (D) x 45 (W) x 234 (H) cm

DAVIVENDY TOUCH MULTIFUNCTION SCALE

CALORIC EXPENDITURE

The basal metabolic rate (BMR) is the minimum energy needed to sustain life (breathing, body temperature, etc.). This rate is not the same for everyone and depends on factors such as gender, age or weight.

BODY COMPOSITION

Body composition is relevant when assessing the athletic performance (muscle mass gain, adjustment of fat loss), or the effectiveness of the diet, based on a proportioned and healthy body fat loss and the regulation of body fluids.

Calculates:

- **Weight** and **Height**
- **BMI** (*Body Mass Index*)
- **Body Fat**
- **BMR** (*Basal Metabolic Rate*)
- **Body Composition** (*Fat, Water, Protein and Mineral*)
